Serial No. 10/789,749  
Page 5 of 6REMARKS

Claims 11-16 are now pending in the application with claims 1-10 cancelled herein. No new matter has been added.

The Examiner is thanked for agreeing to and conducting an interview with the undersigned on April 11, 2007. Though no agreement was reached, it is believed that distinguishing features of the instant claims over the cited reference were discussed.

Claims 1-16 are rejected under 35 U.S.C. § 103(a) as unpatentable over U.S. Patent No. 6,628,632 to Dolan in view of U.S. Patent No. 6,108,547 to Yamashita. The rejection is respectfully traversed for at least the following reasons.

Claim 11 of the instant application recites in part both transmitting data without renewing identification information, and transmitting data by renewing identification information. In contrast, the relied upon portions of Dolan col. 7, line 62 to col. 8, line 23 does not teach or suggest transmitting data without renewing identification information both in instances where a call is terminated and also in cases where a handoff is forced. Accordingly, it is submitted that neither Dolan nor Yamashita, whether cited alone or in combination teach or suggest each and every element of independent claims 11. Therefore claim 11 patentably distinguishes over the relied upon portions of Dolan and Yamashita and is allowable. Claims 12-16, which depend from claim 11 are allowable therewith.

In view of the remarks set forth above, this application is in condition for allowance which action is respectfully requested. However, if for any reason the Examiner should consider this application not to be in condition for allowance, the Examiner is respectfully requested to telephone the undersigned attorney at the number listed below prior to issuing a further Action.
